

COMPLETE FIRE PROTECTION

for your premises.

Managing risk, compliance and fire maintenance solutions for your protection.

Managing fire safety and systems for multi-dimensional commercial and residential facilities is our strength.

We provide fire systems design and installation services for new commercial constructions - for retail or multi-storey residential complexes, including shopping centres, educational facilities, and apartments as well as ongoing service and maintenance for existing sites and locations, ensuring the safety of your employees, clients and property.

Whether a structure is designated for commercial or residential use, we work with a wide range of industry professionals including Construction Managers, Facility Managers, Building Managers, Real Estate and Property Managers to ensure fire safety obligations are managed in accordance with legislation.

Protecting your business, your employees and your customers and visitors is our priority.

The fire safety specialists.

The EndFire Engineering team are qualified fire safety specialists and hold relevant industry licences and accreditations. We keep up to date with the latest industry legislation and industry specific requirements for your end-to-end fire safety and systems management.

We ensure the fire safety systems and equipment in your premises meet safety standards and perform in an emergency. We are experienced in providing customised systems for commercial kitchens, IT server rooms, vehicles and major electrical rooms, tailoring the system to the specific building requirements.

EndFire Engineering undertake regular audits and can manage compliance of fire safety systems and equipment for your long term benefit. We can also assist you with your policies and procedures, training for your onsite teams and relevant emergency and fire safety signage.

Professional, reliable, responsive.

"I have found EndFire Engineering very professional and very reliable. They are responsive to our needs and address any issues promptly. We have regular review meetings and they always get excellent ratings. I would continue to work with EndFire Engineering in the future."

End-to-end fire safety solutions.

EndFire Engineering provide specialist design and installation, ongoing service and maintenance, audit, compliance and training for a range of businesses in Commercial, Retail and Facilities Management.

We provide and service a range of specialist fire safety systems, equipment and hardware for small- and large-scale buildings and facilities from fire detection and warning systems, to sprinkler and deluge systems, suppressants and fire doors. And, our fire safety technicians are trained and familiar with all brands of fire protection products including Chubb, Wormald, Tyco, Viking, Victaulic, Ansul, Flamestop, Notifier, Siemens, Ampac, Pertronics, and Edwards.

Fire safety is our priority.

Our team of highly experienced fire protection and safety specialists deliver fire safety solutions focused on keeping you, your employees, and your property safe at all times.

We apply our technical know-how and experience to design, install and maintain fire systems and equipment, providing end-to-end fire systems and safety services for our clients.

Managing fire risk, ensuring compliance and providing maintenance solutions is our priority.

The complete fire protection solution.
