

COMPLETE FIRE PROTECTION

Managing fire risk, compliance and maintenance solutions is our priority.

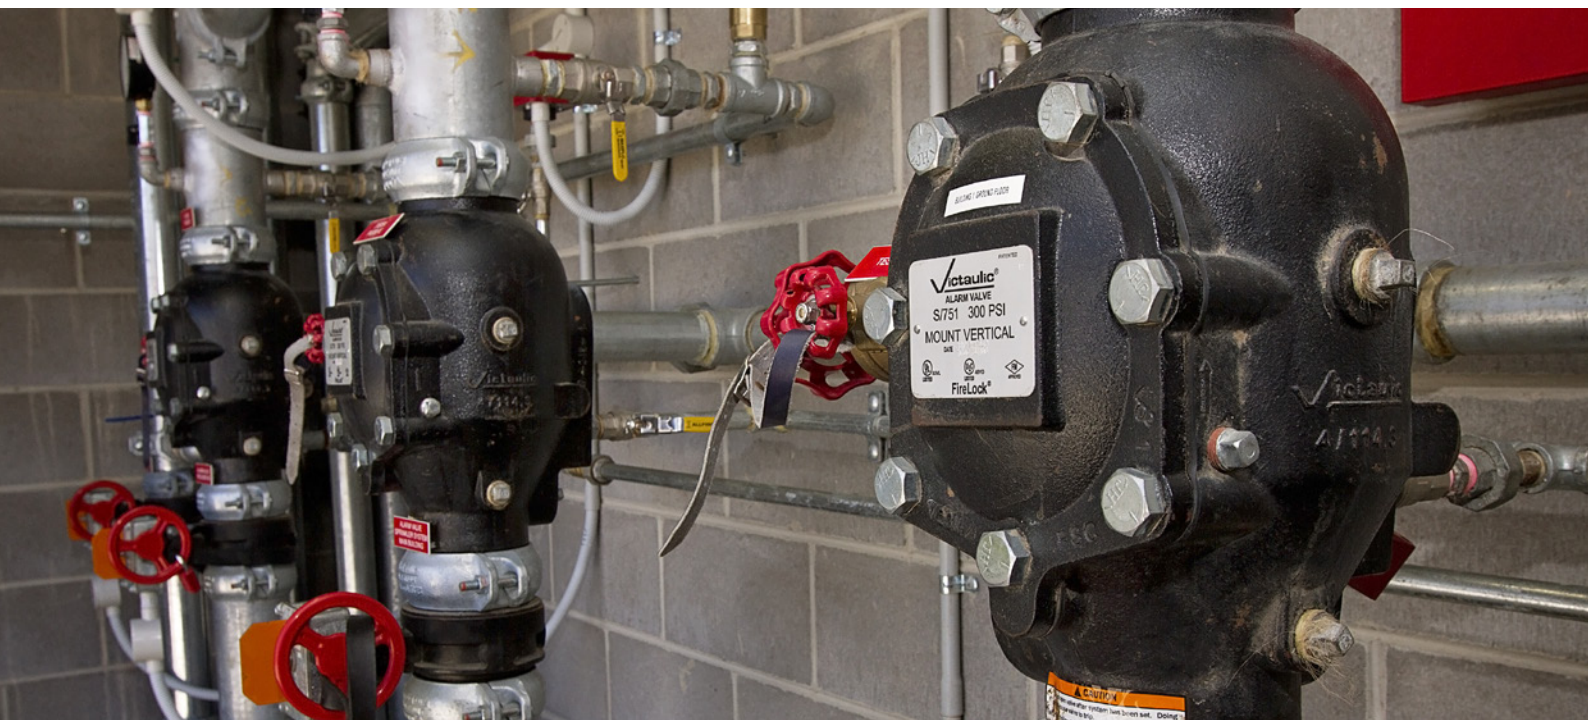

The experts in fire safety design, installation and maintenance

With more than 18 years' experience, we provide fire safety and systems to clients across a range of sectors including heavy industry and mining, commercial real estate and property development, healthcare and aged services, commercial and retail, as well as local, state and federal government.

Our team of qualified and licenced fire technicians throughout Queensland and the Northern Territory, specialise in delivering fire prevention and safety systems and equipment for businesses large and small; and we support your staff with comprehensive and compliant training and procedures to ensure they have the information and resources they need to manage your fire safety obligations.

- Evacuation Diagram Signage

"EndFire Engineering are very knowledgeable about fire safety systems and ensure we are compliant with our obligations under legislation – to ensure we meet fire safety standards. We have several heritage buildings that have their own unique requirements and constraints and EndFire apply their knowledge and experience to managing these sites appropriately.

They are very approachable and reliable. If I have something that needs attending to, I know that I can hand this over to the EndFire team and they will look after it. We are very satisfied with EndFire Engineering and will continue to use them for our sites."

Ian Randall, Brisbane Racing Club
